

FDV – Management, Operation, and Maintenance

Gjøco Proff Lettsparkel Grov

Proff Lettsparkel Grov is a high-quality lightweight filler for indoor use in dry rooms. The product is easy to apply and sand, and is well suited for situations where extra filling capacity is needed. It should not be used for embedding paper tape. The product is ideal for filling and full-surface filling in renovation and new construction. Suitable for most substrates, it provides a surface that can be painted over.

Revised: 11.06.2025

Instructions for Use

Substrate:	The surface must be clean and dry.
Type:	Latex copolymer with white dolomite as filler.
Application method:	Steel trowel.
Cleaning agent:	Water.
Thinner:	Normally should not be thinned.
Storage:	Store in a dry and frost-free place, out of reach of children.
Transport:	Not classified as hazardous goods according to current regulations.
Indoor environment / Emissions:	The product emits low levels of emissions.

Technical Data and Safety Information

A technical data sheet and a safety data sheet (HMS / SDS) have been prepared for the product. See www.gjoco.no.

Maintenance

Cleaning:	Not applicable. The product is not used on its own.
Interval:	Not applicable. The product is not used on its own.

Waste Disposal

Filler must not be emptied into drains or released into nature but must be delivered to an approved hazardous waste disposal facility. Empty, clean, and dry plastic packaging without a handle can be disposed of as plastic waste.

Repairs / Damage

Repairs and damage should be repaired using the same type of product. If other products are used, it must be documented that they are of the same type as previously used. When repairing damage, the work should be carried out so that it does not differ from previous treatments. When repainting or changing color, it is recommended to use the same product as before. Contact your dealer or paint company for advice.
