

## FDV – Management, Operation, and Maintenance

### Gjøco Proff Lettsparkel Våtrom

Proff Lettsparkel Våtrom is a medium-grained lightweight hand filler for indoor use in wet rooms. It is used for leveling and joint filling on building boards such as chipboard, fiberboard, and gypsum boards. When joint filling gypsum boards, paper tape must be used.

Revised: 11.06.2025

#### Instructions for Use

<b>Substrate:</b>	The surface must be clean and dry.
<b>Type:</b>	Latex polymer with aluminum silicate and white dolomite as fillers.
<b>Application method:</b>	Steel trowel
<b>Cleaning agent:</b>	Water.
<b>Thinner:</b>	Normally should not be thinned.
<b>Storage:</b>	Store in a dry and frost-free place, out of reach of children.
<b>Transport:</b>	Not classified as hazardous goods according to current regulations.

#### Technical Data and Safety Information

A technical data sheet and a safety data sheet (HMS / SDS) have been prepared for the product. See [www.gjoco.no](http://www.gjoco.no).

#### Maintenance

<b>Cleaning:</b>	Not applicable. The product is not used on its own.
<b>Interval:</b>	Not applicable. The product is not used on its own.

#### Waste Disposal

The product must be delivered to an approved facility for such waste. The product must not be poured into the environment, sewage, or water. Empty and dry packaging should be delivered to an approved facility.

#### Repairs / Damage

Repairs and damage should be repaired using the same type of product. If other products are used, it must be documented that they are of the same type as previously used. When repairing damage, the work should be carried out so that it does not differ from previous treatments. When repainting or changing color, it is recommended to use the same product as before. Contact your dealer or paint company for advice.
