Gjøco Fyllstoff Del C is used as an additive in GjøcoPoxy SL.

Revised:

23.01.2026

Symbols

Areas of use:

Production facilities
Parking garages
Warehouses
Industrial premises
Laboratories
Hospitals
Food industry
For interior and exterior use

Type:	Powder for epoxy.
Mixing ratio:	12 kg Gjøco Filler Part C to 10 kg GjøcoPoxy SL Part A+B.

Directions for use:

Mix GjøcoPoxy SL Del A and B thoroughly for 3–4 minutes using a mechanical stirrer (a drill fitted with a mixing paddle). Then, while stirring, gradually add GjøcoPoxy Fyllstoff Del C at a mixing ratio of 1.2:1. Mix well until homogeneous.

Storage:

The product must be stored in accordance with national regulations. The container must be kept tightly closed and stored in a dry place at a stable temperature. Transport and store in a dry, frost-free environment.

Waste Disposal:

Liquid epoxy must not be poured into drains or released into the environment but should be delivered to a waste disposal facility. Cured epoxy can be delivered to recycling stations as residual waste; however, it is recommended to contact the local facility for specific guidance, as local regulations may vary.

Safety

Refer to the separate safety data sheet. Read the information on the packaging.
Packaging size: 12 kg.

The information in this data sheet is based on laboratory tests and practical experience. Since the conditions under which the products are used are often beyond our control, we can only guarantee the quality of the product itself. The products are supplied in accordance with our general terms of sale, delivery, and service, unless otherwise agreed in writing. We reserve the right to change the stated data without prior notice. Paint should be considered a semi-finished product, and the result depends on surface preparation, temperature, application, type of substrate, etc. This data sheet supersedes all previous editions.
