

Product datasheet

Gjøco Terrasserens Gel Extra

Gjøco Terrasserens Gel Extra is a strong, alkaline cleaning agent for removing old terrace stain, wood oil, dirt and contamination. Bleaches and refreshes the wood color on decking and garden furniture. For use on terraces and garden furniture. Do not use on larch, hardwood and exotic woods. Avoid contact of Gjøco Terrasserens Gel Extra with plants, painted surfaces, aluminum and glass. Rinse off any spills with clean water. Should only be used before applying wood oil, terrace oil or terrace stain.

Symbols

Ingredients

Aqua
Potassium hydroxide

Technical data

Type:	Alkaline cleaning agent
Specific gravity:	1.18 kg/l
pH value:	13.5

Usage data

Application method:	Brush or roller. Rinse off with garden hose.
Recommended spreading rate:	Approx. 4-6 m ² /litre, depending on previous treatment and fouling.
Mixing ratio:	Use undiluted.
Minimum application temperature:	+10 °C. Best effect at +15 °C to +20 °C. Do not use in sunlight.

Directions for use

The wood to be treated is well moistened with water before applying Gjøco Terrasserens Gel Extra. Gjøco Terrasserens Gel Extra should be used undiluted. Apply with a brush or roller. After 30-60 minutes of application time, scrub the wood clean with a stiff brush. Rinse well with clean water. Use a garden hose. A high-pressure washer can be used, but avoid damaging the wood surface. Repeat the treatment if necessary. Tip! If there are many layers of previous treatments on the surface, apply one thick coat of Gjøco Terrasserens Gel Extra and cover with thin plastic and let it work for a few hours. Rinse well with water. Any loose wood fibers must be sanded away before further treatment. Should not be used in direct sunlight, as this will shorten the application time and increase the chance of drying out before scrubbing.

	The wood must be completely dry before further treatment with wood oil, terrace oil or terrace stain.
Storage	Screw the top back on when storing to prevent spillage and drying out. The product must be transported and stored upright, dry and frost-free.
Disposal of waste	The product must not be emptied into sewers or into nature but delivered to an environmental station. 
Other information	Contains lye (Potassium hydroxide). The liquid is corrosive. Do not swallow. Keep locked up and out of reach of children. Wear gloves and protective goggles. Avoid splashing in the eyes and on the skin as the liquid is corrosive. In case of splashing in the eyes, rinse immediately and thoroughly with large amounts of clean water. In case of accident or if you feel unwell, seek immediate medical attention. See also the safety data sheet. Packaging size: 4 liters
Safety	See separate safety data sheet. Read the information on the packaging.
