

Product data sheet

Gjøcorens

Gjøcorens is a cleaning agent suitable for most types of thermoset plastics. It can be used for cleaning spills and tools used with, for example, epoxy, polyurethane, polyurea, and polyester. The product has a softening effect and will, over time, dissolve certain types of plastic. Gjøcorens is a good alternative to aliphatic and aromatic solvents such as xylene, methoxypropanol, and butanol, as it is milder and emits little odor.

Revised 19.02.2025

Symbols

Technical Data

Type:	Synthetic ester
Density:	Approx. 1.1 kg/l
Flash point:	>70 °C
Solubility:	Soluble and miscible with water
Recommended glove material:	PVC and neoprene

Storage

The packaging must be kept tightly closed and stored in a dry place at a stable temperature. The product should be transported and stored upright, in a dry and frost-free environment.

Waste Disposal

The product must not be disposed of in drains or the environment. It should be delivered to an approved hazardous waste disposal facility.

Additional Information

Packaging sizes: 10 liters

Safety

Refer to the dedicated Safety Data Sheet (SDS).
Read the information on the packaging.

The information in this data sheet is based on laboratory tests and practical experience. Our products are considered semi-finished goods. Since the conditions under which the products are used are often beyond our control, we can only guarantee the product's quality. Products are supplied in accordance with our general terms for sales, delivery, and service unless otherwise agreed in writing. We reserve the right to make minor product changes and update the specified data without prior notice. This data sheet replaces previous editions.
