Gjøco Husvask Ejektor 2,5 L

Gjøco Husvask ejektor is an effective cleaning and disinfecting agent made from biodegradable raw materials for annual outdoor washing of houses. It removes pollution, black mold, grease, soot, moss, and dust from house walls, privacy screens, garden furniture, fences, and terraces. The container is directly connected to the garden hose, where the correct dosage is automatically applied.

Information about Ingredients

Non-ionic surfactants 5-15%, anionic surfactants, amphoteric surfactants <5%

Ingredients

Aqua

Potassium carbonate

Alcohol, C10 , ethoxylated

Oxirane, 2-methyl-, polymer with oxirane, mono-C10-16-alkyl ethers, phosphates

Cocamidopropyl Betaine

Potassium hydroxide

Technical Data

Type: Synthetic cleaning agent

Specific gravity (kg/l): 1,06

pH value, diluted solution: 11

Application Data

Application method: Ejektor connected to garden hose or low-pressure sprayer, spray. Rinse off with garden hose.

Recommended consumption: 1 liter of cleaning solution for approx. 15 m².

Mixing ratio: Normal dosage: 1:30, does not apply when using ejektor.

Minimum application temperature: >0°C. Best effect at >+20°C. Should not be used in

Dosage

When using the ejektor, the container is connected to the garden hose, and the dosage is applied automatically.

Application Method	<p>The surface must be dry before treatment. Apply using a pressure washer, pump sprayer, broom/brush with extension handle, sponge, or other suitable equipment. A pressure washer should be used with caution on wooden facades. Do not apply in direct sunlight or on hot surfaces. Ensure that the cleaning agent does not dry on glass or other surfaces being cleaned, as it may leave permanent streaks. Avoid spraying Gjøco Husvask directly on plants. Any spills should be rinsed off with water. Avoid getting the cleaning agent on self-cleaning windows as it may damage the cleaning layer.</p> <p>Apply Gjøco Husvask with smooth, even movements from bottom to top, ensuring that all surfaces are wetted to avoid streaks. Avoid the cleaning agent running onto dry surfaces. Let the product work for 3-5 minutes. Rinse thoroughly with water from bottom to top. Finish with a thorough rinse from top to bottom.</p>
Storage	Tighten the lid properly when storing to prevent spillage and drying. The product should be transported and stored upright, in a dry and frost-free place.
Waste Disposal	<p>The product should not be emptied into sewage drains or the environment, but should be delivered to a recycling station. Empty, clean, and dry plastic packaging can be disposed of as plastic waste.</p> <div data-bbox="550 958 805 1041">  </div>
Additional Information	It is not recommended to remove the ejector from the packaging as it may cause leakage. Packaging size: 2.5 liters.
Safety	See the separate safety data sheet. Read the information on the packaging.

The information on this datasheet is based on laboratory tests and practical experience. Our products are considered semi-finished goods, and since the conditions under which the products are used often lie outside our control, we cannot guarantee anything other than the product's quality. The products are supplied in accordance with our general terms and conditions for sales, delivery, and service, unless otherwise agreed in writing. We reserve the right to make minor product changes and to modify the specified data without prior notice. This datasheet supersedes previous versions and will automatically be annulled 5 years after the release date.
